Review

Bone morphogenetic proteins (BMPs): how do they function and what can they offer the clinician?

Nikitias Sykaras and Lynne A. Opperman57

Original

Altered pre- and postsynaptic dopamine receptor functions in spontaneously hypertensive rat: an animal model of attention-deficit hyperactivity disorder

Satoshi Fujita, Hiroko Okutsu, Haruhiko Yamaguchi, Shin Nakamura, Kazunori Adachi, Tadashi Saigusa and Noriaki Koshikawa75

Hyaluronan (hyaluronic acid) and its regulation in human saliva by hyaluronidase and its inhibitors

Michael Anthony Pogrel, Marie Anne Low and Robert Stern85

Does a clinical evaluation of oral cleanliness correlate with caries incidence in preschool children?

Findings from a cohort study

Mitsuko Seki, Fumiyuki Karakama and Yoshihisa Yamashita93

The cell extract of *Porphyromonas gingivalis* promotes attachment of *Prevotella nigrescens* cells to hydroxyapatite

Yasuyuki Hirano, Kouichiro Kuroda, Muneaki Tamura and Kunio Hayashi99

Detection of *Helicobacter pylori* in recurrent aphthous ulceration by nested PCR

Anak Iamaroon, Siriporn Chaimano, Sukanya Linpisarn, Surawut Pongsiriwet and Kannikar Phornphutkul107

Production of antibody against a synthetic peptide of *Porphyromonas gingivalis* 40-kDa outer membrane protein

Yoshiaki Tsurumi, Mitsuo Hayakawa, Yasuko Shibata and Yoshimitsu Abiko111

Case report

Oral findings in Noonan syndrome: report of a case

Mitsugi Okada, Naoko Sasaki, Yasutaka Kaihara, Rinzo Okada, Hideaki Amano, Kazuo Miura and Katsuyuki Kozai117
