

# Journal of Oral Science

## CONTENTS

### Original

#### Detection of *Streptococcus anginosus* and 8-hydroxy-deoxyguanosine in saliva

Naoyuki Sugano, Kyosuke Yokoyama, Maiko Oshikawa, Kyoichi Kumagai, Masatoshi Takane, Hajime Tanaka and Koichi Ito .181

#### GABA<sub>A</sub> receptors in the nucleus accumbens core modulate turning behavior induced by dopamine receptor stimulation

Gaku Akiyama, Hiroko Ikeda, Satoshi Matsuzaki, Michiko Sato, Shoko Moribe and Noriaki Koshikawa .....185

#### Fluoride availability and stability of Japanese dentifrices

Lina Naomi Hashizume, Ynara Bosco de Oliveira Lima, Yoko Kawaguchi and Jaime Aparecido Cury .....193

#### The anti-adherence effect of *Piper betle* and *Psidium guajava* extracts on the adhesion of early settlers in dental plaque to saliva-coated glass surfaces

Fathilah Abdul Razak and Zubaidah Haji Abd Rahim .....201

#### Investigation of the bone tissue response to glass-ionomer microimplants in the canine maxillary alveolar ridge

Nikola Burić, Goran Jovanović, Dragan Krasić and Ljiljana Kesić .....207

#### Histogenesis and disappearance of the teeth of the Mekong giant catfish, *Pangasianodon gigas* (Teleostei)

Yoshiko Kakizawa and Wanpen Meenakarn .....213

### Case report

#### Calcium pyrophosphate dihydrate arthropathy with condylar destruction of the temporomandibular joint

Hitoshi Osano, Koichi Matsumoto and Mikio Kusama .....223

#### Treatment planning in a case of restoration of the maxilla and mandible using osseointegrated implants with four types of bone graft

Minoru Hori, Katsuhiko Kaneko, Daisuke Harada, Kouji Nakanishi, Takayoshi Tanaka, Teruhiko Ishii and Hiroshi Tanaka ...227

### Short communication

#### Is there evidence of a sphincter system in Wharton's duct? Etiological factors related to sialolith formation

Afshin Teymoortash, Annette Ramaswamy and Jochen Alfred Werner .....233
