CONTENTS

Review

The use of lasers for direct pulp capping
Takashi Komabayashi, Arata Ebihara, and Akira Aoki ................................. 277

Original

Comparative study of cytokeratin and langerin expression in keratinized cystic lesions of the oral and maxillofacial regions
Miyako Hoshino, Harumi Inoue, Kentaro Kikuchi, Yuji Miyazaki, Atsuo Yoshino, Hiroyuki Hara, Tadashi Terui, Kaoru Kusama, and Hideaki Sakashita ........................................ 287

Telomerase activity in the occurrence and progression of oral squamous cell carcinoma
Yuji Miyazaki, Noriaki Yoshida, Tadashige Nozaki, Harumi Inoue, Kentaro Kikuchi, and Kaoru Kusama ................................. 295

Effect of ionomycin on interaction of calnexin with vesicular stomatitis virus glycoprotein is cell type-specific
Michisato Okudera, Takahiro Gojoubori, Ichiro Tsujino, and Masatake Asano .............................................................. 305

Temporal expression in rats of receptor tyrosine kinase Tie2 during early wound healing after tooth extraction
Hirotaka Sato, Shuya Kasai, and Chihaya Maesawa ............................................. 313

RUNX2 expression during early healing of tooth-extraction wounds in rats
Hirotaka Sato and Yutaka Takaoka .................................................................. 319

Ten-year analysis of oral cancer focusing on young people in northern Thailand
Nicha Komolmalai, Sompol Chuachamsai, Salee Tantiwipawin, Sarita Dejsuvan, Patcharaluk Buhngamongkol, Chanika Wongvised, Imjai Chitapanarux, and Anak Iamaroon ............................................................................. 327

Association of periodontal status with liver abnormalities and metabolic syndrome
Aisyah Ahmad, Michiko Furuta, Takashi Shinagawa, Kenji Takeuchi, Toru Takeshita, Yoshihiro Shimazaki, and Yoshihisa Yamashita ........................................................ 335

Use of the Strength of Recommendation Taxonomy (SORT) to assess full-mouth treatments of chronic periodontitis
Antonio Canabarro, Élcio Marcantonio Jr, and Gustavo De-Deus ............................................................... 345

Characteristics of middle-aged and older patients with temporomandibular disorders and burning mouth syndrome
Mika Honda, Takashi Iida, Osamu Komiyama, Manabu Masuda, Takashi Uchida, Hitoshi Nishimura, Masakazu Okubo, Michiharu Shimosaka, Noriyuki Narita, Hideo Niwa, Hideyuki Kubo, Antoon De Laat, Misao Kawara, and Yasuhide Makiyama ........................................ 355
Micro-CT assessment of the sealing ability of three root canal filling techniques
Berkan Celikten, Ceren F. Uzuntas, Ayse I. Orhan, Pelin Tufenkci, Melis Misirli, Kemal O. Demiralp, and Kaan Orhan........ 361

Effects of different antibacterial agents on enamel in a biofilm caries model
Selcuk Savas, Ebru Kucukyilmaz, Esra U. Celik, and Mustafa Ates ................................................................. 367

Comparative analysis of the gonial angle on lateral cephalometric radiographs and panoramic radiographs
Masao Araki, Takeshi Kiyosaki, Mai Sato, Kiyomi Kohinata, Kunihito Matsumoto, and Kazuya Honda ................... 373

Effect of brushing with two different abrasives on fluoride release by high-viscosity glass ionomer cement
Hani M. Nassar and Jeffrey A. Platt ................................................................. 379

Case Report

Eleven-year clinical performance of a mandibular natural tooth pontic bonded with modified tri-n-butylborane initiated adhesive resin
Mitsuo Nakamura, Hiroshi Nogawa, and Hideo Matsumura................................................................. 385

Osteochondroma of the coronoid process of the mandible
Kunihiko Sawada, Dirk Schulze, Kunihito Matsumoto, Shigenori Hirai, Koji Hashimoto, and Kazuya Honda........... 389
